

Ignatius Filbert Sevilen

FULL STACK ENGINEER

Jakarta, Indonesia | (+62) 8212-2848-688 | sevilenfilbert@gmail.com | github.com/FilbertSevilen1 | <https://www.linkedin.com/in/ignatius-filbert-sevilen-894467231/> | Portofolio: <https://ignatius-filbert-sevilen.vercel.app/>

Objective

Full Stack Engineer with expertise in building scalable, user-focused web applications and AI-driven solutions. Proficient in both front-end and back-end technologies, including Angular.js, Vue.js, Next.js, Flask, Express.js, and .NET. Eager to contribute to innovative projects by delivering high-quality, efficient, and maintainable solutions that drive business growth, improve user experience, and solve complex technical challenges in a collaborative environment.

Experience

Full-Stack Engineer | Maybank Finance

Jul 2024 – Present

Full-time

- **Large Language Model Website and API:** Building and maintaining a website and API to integrate large language models locally, enabling users to interact with advanced language processing capabilities using ASP.NET, SQL Server, and Vue.js
- **Led a Company Blast Notification CMS Project:** Led a small team to design and build CMS pages and a python console that capable of sending notifications to up to 100,000 customers.
- **CI/CD Implementation** using Docker and Jenkins, to replace manual deployment.
- **Developing OCR for Indonesian KTP:** Implementing a Convolutional Neural Network (CNN) model using Python and Flask to enable the processing of Images and Documents
- **Liveness Face Recognition:** Designing and deploying a liveness detection system to enhance the security of facial recognition applications for financial services. Using Node.js and Vue.js
- **Electronic Document Signing Application:** Exploring and developing an electronic document signing platform using M-Files, streamlining workflows for document authentication using Vue.js and ASP.NET
- **Developing, Maintaining and Enhancing Company's Website:** Responsible for ensuring optimal performance and maintenance of key business applications, such as the Service Support, Electronic Sign, Profile Website, Car Auction and Sales Website. Using ASP.NET, SQL Server, and Vue.js

Software Developer Freelance | Cosmic Marketing Corporation

Jul 2025 – Present

Part-time

- **Developing Business Websites:** Creating robust and visually appealing websites for businesses, ensuring responsive design, optimized performance, and seamless user experience. Using React.js, MySQL, and Node.js
- **Managing Products in Marketplace Websites:** Managing products in marketplace websites, including listing creation, content optimization, inventory updates, and pricing adjustments to maximize sales and visibility.

Full-Stack Developer Freelance | Cosmic Marketing Corporation

Jan 2024 – Sept 2025
