PROFESSIONAL SUMMARY

Full Stack Engineer with expertise in building scalable, user-focused web applications and AI-driven solutions. Proficient in both front-end and back-end ecosystems, including Angular.js, Vue.js, Next.js, Flask, Express.js, and .NET. Experienced in leading small teams, optimizing deployment pipelines, and integrating machine learning models into enterprise environments. Driven to deliver high-quality, maintainable software solutions that solve complex technical challenges and support business growth.

CORE SKILLS

Languages:	Python, JavaScript, TypeScript, C#, SQL
Frontend:	React.js, Next.js, Vue.js, Nuxt3, Angular.js, HTML5, CSS3
Backend:	ASP.NET Core, FastAPI, Express.js, Node.js, Flask
Databases:	Microsoft SQL Server, MySQL, MongoDB
AI & ML:	Convolutional Neural Networks (CNN), OCR Implementation, Biometric Liveness Detection
DevOps & Tools:	Git, GitHub, GitLab, Docker, Jenkins (CI/CD), Postman, M-Files

PROFESSIONAL EXPERIENCE

Maybank Finance – Full-Stack Engineer Jul 2024 – Present

- Developed and maintained an API and web dashboard to integrate large language models (LLMs) locally, enabling offline, advanced natural language processing via ASP.NET, SQL Server, and Vue.js.
- Led a small development team to architect a centralized Company Blast Notification CMS and a Python-based console capable of transmitting updates to 100,000 customers simultaneously.
- Replaced manual deployment workflows by building and deploying automated CI/CD pipelines using Docker and Jenkins.
- Engineered an Indonesian KTP OCR pipeline utilizing a Convolutional Neural Network (CNN) in Python and Flask to automate image classification and text extraction.
- Designed and deployed a biometric liveness face recognition detection system using Node.js and Vue.js to safeguard digital financial service workflows.
- Researched and integrated an electronic document signing architecture with M-Files using Vue.js and ASP.NET to streamline validation procedures.
- Optimized performance, resolved critical bugs, and delivered feature updates for core business web applications, including Service Support, Electronic Sign, Car Auction, and Sales portals using ASP.NET, SQL Server, and Vue.js.

Cosmic Marketing Corporation – Software Developer Freelance Jul 2025 – Present

- Architected responsive, high-performance business websites using React.js, MySQL, and Node.js to enhance digital engagement and brand presence.
- Managed automated product pipelines across marketplace websites, coordinating content optimization and dynamic pricing rules to scale sales and SEO visibility.

Cosmic Marketing Corporation – Full-Stack Developer Freelance

Jan 2024 – Sept 2025

- Developed custom web applications and e-commerce portals using React.js, MySQL, and Node.js, ensuring optimized render speeds and clean navigation structures.
- Supervised inventory catalog updates and digital promotional landing assets to increase e-commerce conversion rates.

Maybank Finance – Software Developer Intern

Feb 2023 – Feb 2024

- Re-engineered legacy corporate web interfaces utilizing Nuxt3, Vue.js, and ASP.NET to optimize the core customer digital experience.
- Redesigned user interfaces for targeted marketing campaign landing pages, significantly boosting front-end user engagement.
- Developed an end-to-end customer voucher redemption approval system from scratch using ASP.NET and Vue.js, increasing operational efficiency.

KEY PROJECTS

Masamas – Personal Project

May 2026 – Jun 2026

- Developed a comprehensive e-commerce platform for a building store specializing in construction materials using Next.js, React, Node.js, and MySQL.
- Implemented multi-parameter product filter grids, dynamic catalog listings, and a persistent shopping cart layout.

Stonks – Client Project

Apr 2025 – Dec 2025

- Built a multi-layered MetaTrader account management application consisting of three distinct instances: Admin Dashboard, Client Portal, and a Copy Trade Bot engine using FastAPI, MetaTrader API, and Microsoft SQL Server.

Legend of Arcanis – Personal Project

Mar 2025

- Programmed a Next.js web application designed to host gaming guides, community resources, and interactive wikis for the Legend of Arcanis player base.

ZedWheels Website – Freelance Project

Jan 2025

- Engineered a premium e-commerce platform for aftermarket wheel retail featuring smooth dynamic variant filters and fluid layout transitions using Next.js, MySQL, and Node.js.

EDUCATION

BINUS University – Bachelor of Computer Science (Interactive Multimedia Streaming)

Sept 2020 – Sept 2024

GPA: 3.92 / 4.00 | **Summa cum Laude** | Thesis: Equipment management application design for office work activities

Purwadhika Digital Technology School – Web Developer Bootcamp

Mar 2022 – Aug 2022

Intensive full-stack software development program covering HTML, CSS, JavaScript, React.js, Node.js, and relational databases.

Canisius College – Senior High School Science Major

Jul 2017 – May 2020

Final Grade: 91 / 100 | **Magna cum Laude**
